Project Executable Files

Date	29 June 2026
Team ID	SWTID-2026-8613
Project Name	Personalized Networking Assistant (PNS)
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	Yes
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
pns/
|-- app/                       # FastAPI backend application
|    |-- models/                # database.py, schemas.py
|    |-- routers/               # conversation.py, factcheck.py, history.py
|    |-- services/              # event_analyzer.py, topic_generator.py,
|    |                          #   fact_checker.py, json_storage.py
|    |-- config.py
|    `-- main.py
|-- frontend/                   # Streamlit frontend (app.py, utils.py)
|-- frontend-static/            # HTML/CSS/JS SPA (index.html, style.css,
|                              #   app.js)
|-- tests/                      # conftest.py, test_app.py
|-- .env.example
|-- requirements.txt
|-- pns.db
`-- README.md
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://personalized-networking-assistant.streamlit.app/
Login Credentials (Demo)	None required. The application runs open-access for evaluator testing.
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	https://github.com/devanshumeena1/Personalized-Networking-Assistant-code
Demo Video Link	NA

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

```
Pre-requisites:
  Python 3.8+ installed. A modern web browser (Chrome,
  Firefox, Safari, or Edge).

Step 1: Install dependencies
  pip install -r requirements.txt

Step 2: Start the FastAPI backend (port 8000) uvicorn
  app.main:app --reload
  Note: the static HTML/CSS/JS SPA frontend is served
  directly at http://127.0.0.1:8000

Step 3: Start the Streamlit frontend (optional) streamlit
  run streamlit_app.py
  Note: launches automatically at http://localhost:8501

Step 4: Run automated tests
  python -m pytest tests/test_app.py
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Local GPT-2 text generation can be slow on systems without GPU hardware	Resolved: USE_MOCK_ML=True activates a fast local rule-based template engine — instant suggestions, no GPU/CPU overhead.
2	Wikipedia wrapper functions might fail if Wikipedia experiences API rate limits or network issues.	Handled: the fact-checking router catches exceptions gracefully and falls back to a direct Wikipedia search link.
3
