

Code-Layout, Readability and Reusability

Date	27 June 2026
Team ID	SWTID-2026-8613
Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the code quality of the **Personalized Networking Assistant** project in terms of code structure, readability, and reusability. The project follows a modular architecture using **FastAPI**, **Streamlit**, and **SQLite**, with well-organized folders, meaningful variable and function names, proper comments, and reusable components. This ensures that the application is easy to understand, maintain, test, and extend with new features in the future.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Proper indentation and formatting are maintained throughout the project code.	Yes	Proper indentation followed throughout the project.
2	Proper File Structure	Project files are organized into app, routers, services, models, and tests.	Yes	Project organized into app, tests, templates and modules.
3	Meaningful Variable Names	Variables are named clearly to reflect their purpose.	Yes	Clear and descriptive variable names used.
4	Function / Method Names	Functions and methods use descriptive and meaningful names.	Yes	Functions are properly named according to their purpose.
5	Code Comments	Comments and docstrings explain important logic and functionality.	Yes	Important functions are documented with comments.

6	Modular Design	Code is divided into reusable modules such as API routes, services, database, and UI.	Yes	Backend, API routes and UI are separated into modules.
7	No Redundant Code	Reusable functions are used to avoid duplicate code.	Yes	Duplicate code removed and reusable functions created.
8	Error Handling	Exceptions and invalid inputs are handled properly to improve reliability.	Yes	Exceptions handled using try-except and validations.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Conversation Generator	Python (FastAPI)	API Endpoints	High
2	Wikipedia Fact Verification	Python	Fact Check Module	High
3	Streamlit UI	Streamlit	User Interface	High
4	Feedback Module	Python	Feedback Feature	Medium
5	History Module	Python	Conversation History	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Well organized project structure
Readability	5	Easy to understand and maintain.
Reusability	5	Modules can be reused in future projects.

Documentation / Comments	4	Important functions are documented.
Overall Score	4.75/5	High-quality, maintainable code.
