

Scalability & Future Plan

Date	29 June 2026
Team ID	SWTID-2026-8613
Project Name	Personalized Networking Assistant
Maximum Marks	1 Mark

Scalability & Future Plan:

This document describes how the **Personalized Networking Assistant** can be enhanced to support more users, improve performance, strengthen security, and introduce advanced AI features in the future. It also presents the roadmap for expanding the application with new functionalities and better user experience.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Supports limited concurrent users	Performance may decrease with many users	High
2	Uses SQLite database	Limited scalability for large datasets	Medium
3	Internet required for Wikipedia API	Fact verification unavailable without internet	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports small number of users	Deploy on cloud with load balancing

2	Data Storage	SQLite Database	Upgrade to MySQL or PostgreSQL
3	Performance	Basic FastAPI implementation	Add caching and asynchronous processing
4	Security	Basic input validation	Implement JWT authentication and HTTPS

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	LinkedIn Profile Integration	Next 3 Months	More personalized conversation starters
Phase 2	AI Networking Coach	Next 6 Months	Better conversation guidance
Phase 3	Multi-language Support	Next 9 Months	Support users from different regions
Phase 4	Mobile Application	Next 12 Months	Better accessibility and user experience
