

No. of Functional Features Included in the Solution

Date	29 June 2026
Team ID	SWTID-2026-8613
Project Name	Personalized Networking Assistant
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	Conversation Starter Generation	Takes user event description and interests, extracts themes using DistilBERT, and generates 2-3 tailored conversation starters via GPT2.	Backend / NLP Engine	Done	1
2	Theme Extraction (DistilBERT)	Automatically identifies key themes (e.g., AI, sustainability, urban planning) from the event description using the DistilBERT model.	NLP Module	Done	0.5
3	Wikipedia Fact-Check Integration	Fetches summarized and reliable reference facts for any user query using the Wikipedia API, enabling quick pre-event fact verification.	API Integration	Done	0.5
4	Feedback Logger Service	Captures thumbs up / thumbs down feedback from users on generated starters and logs it to a structured file for improving future personalization.	Feedback Module	Done	1
5	Feedback History View	Displays a structured, scrollable view of all previously submitted feedback so users can track which starters were rated useful over time.	Frontend / Streamlit	Done	0.5
6	Conversation History View	Maintains and displays a full record of all past generated conversation starters, allowing users to review, compare, and reuse them.	Frontend / Streamlit	Done	0.5
7	Interactive Streamlit UI	Provides a responsive and modular frontend with input fields for event description and user interests, displaying AI-generated results dynamically.	UI / Frontend	Done	0.5
8	FastAPI Backend & Unit Testing	Implements clearly defined REST API routes and backend services; all endpoints are tested thoroughly using pytest-based unit tests.	Backend / Testing	Done	0.5

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	5

Additional / Nice-to-Have Features	3
Features Tested & Verified	8

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	2	Streamlit UI, Conversation History View
2	Backend / Logic	2	FastAPI Backend, Theme Extraction (DistilBERT)
3	Database / Storage	1	Feedback Logger Service
4	API / Integration	2	Wikipedia Fact-Check API, GPT-2 Generation API
5	Security / Authentication	1	Input Validation via FastAPI
