Customer Journey Map

This Customer Journey Map explains the complete experience of a user while using the Personalized Networking Assistant. It shows what the user does, how they interact with the system, what they think and feel during each step, who manages each process, and how the experience can be improved.

Phase of Journey	Stage 1	Stage 2	Stage3
Actions (What does the customer do?)	• Opens the application. • Enters event description. • Submits the request.	• Waits while the system processes the request. • AI generates theme and conversation starters. • System verifies the response.	• Views personalized results. • Uses conversation starters. • Saves conversation history.
Touchpoint (What part of the service do they interact with)	• Streamlit UI • Event input form • Submit button	• FastAPI Backend • AI Model • Fact Check Module	• Final Response Screen • Conversation History • Database
Customer Thought (What is the customer thinking?)	• I want networking suggestions. • I hope the system understands my event. • It should be easy to use.	• I hope the suggestions are accurate. • I want relevant conversation starters. • The response should be quick.	• These suggestions are useful. • I can confidently start conversations. • I will use this again.
Customer Feeling (What is the customer feeling?)	• Curious • Hopeful • Interested	• Excited • Confident • Engaged	• Satisfied • Happy • Motivated

Process Ownership (Who is in the lead on this?)	• Streamlit Frontend	• FastAPI Backend • GPT Model • Fact Check Module	• Response Module • History Module • Database
Opportunities (How can we improve this stage?)	• Simplify event input. • Improve UI design. • Add input suggestions.	• Improve AI accuracy. • Reduce response time. • Enhance fact-checking.	• Allow export/share results. • Provide more personalized suggestions. • Improve history management.
